

BUNKERTECH

THE MARKET-LEADING
MARINE FUELS TRADING
AND SUPPLY MANAGEMENT
SYSTEM

INATECH[®]
An Aspire Software Company

We Understand Your Challenges

Marine fuel markets are quite complex and continually evolving. We realize that back-to-back traders and physical suppliers face unique challenges. To succeed, you need to effectively manage **price volatility, credit risk, inventory, mark-to-market position, regulatory compliance and much more!**

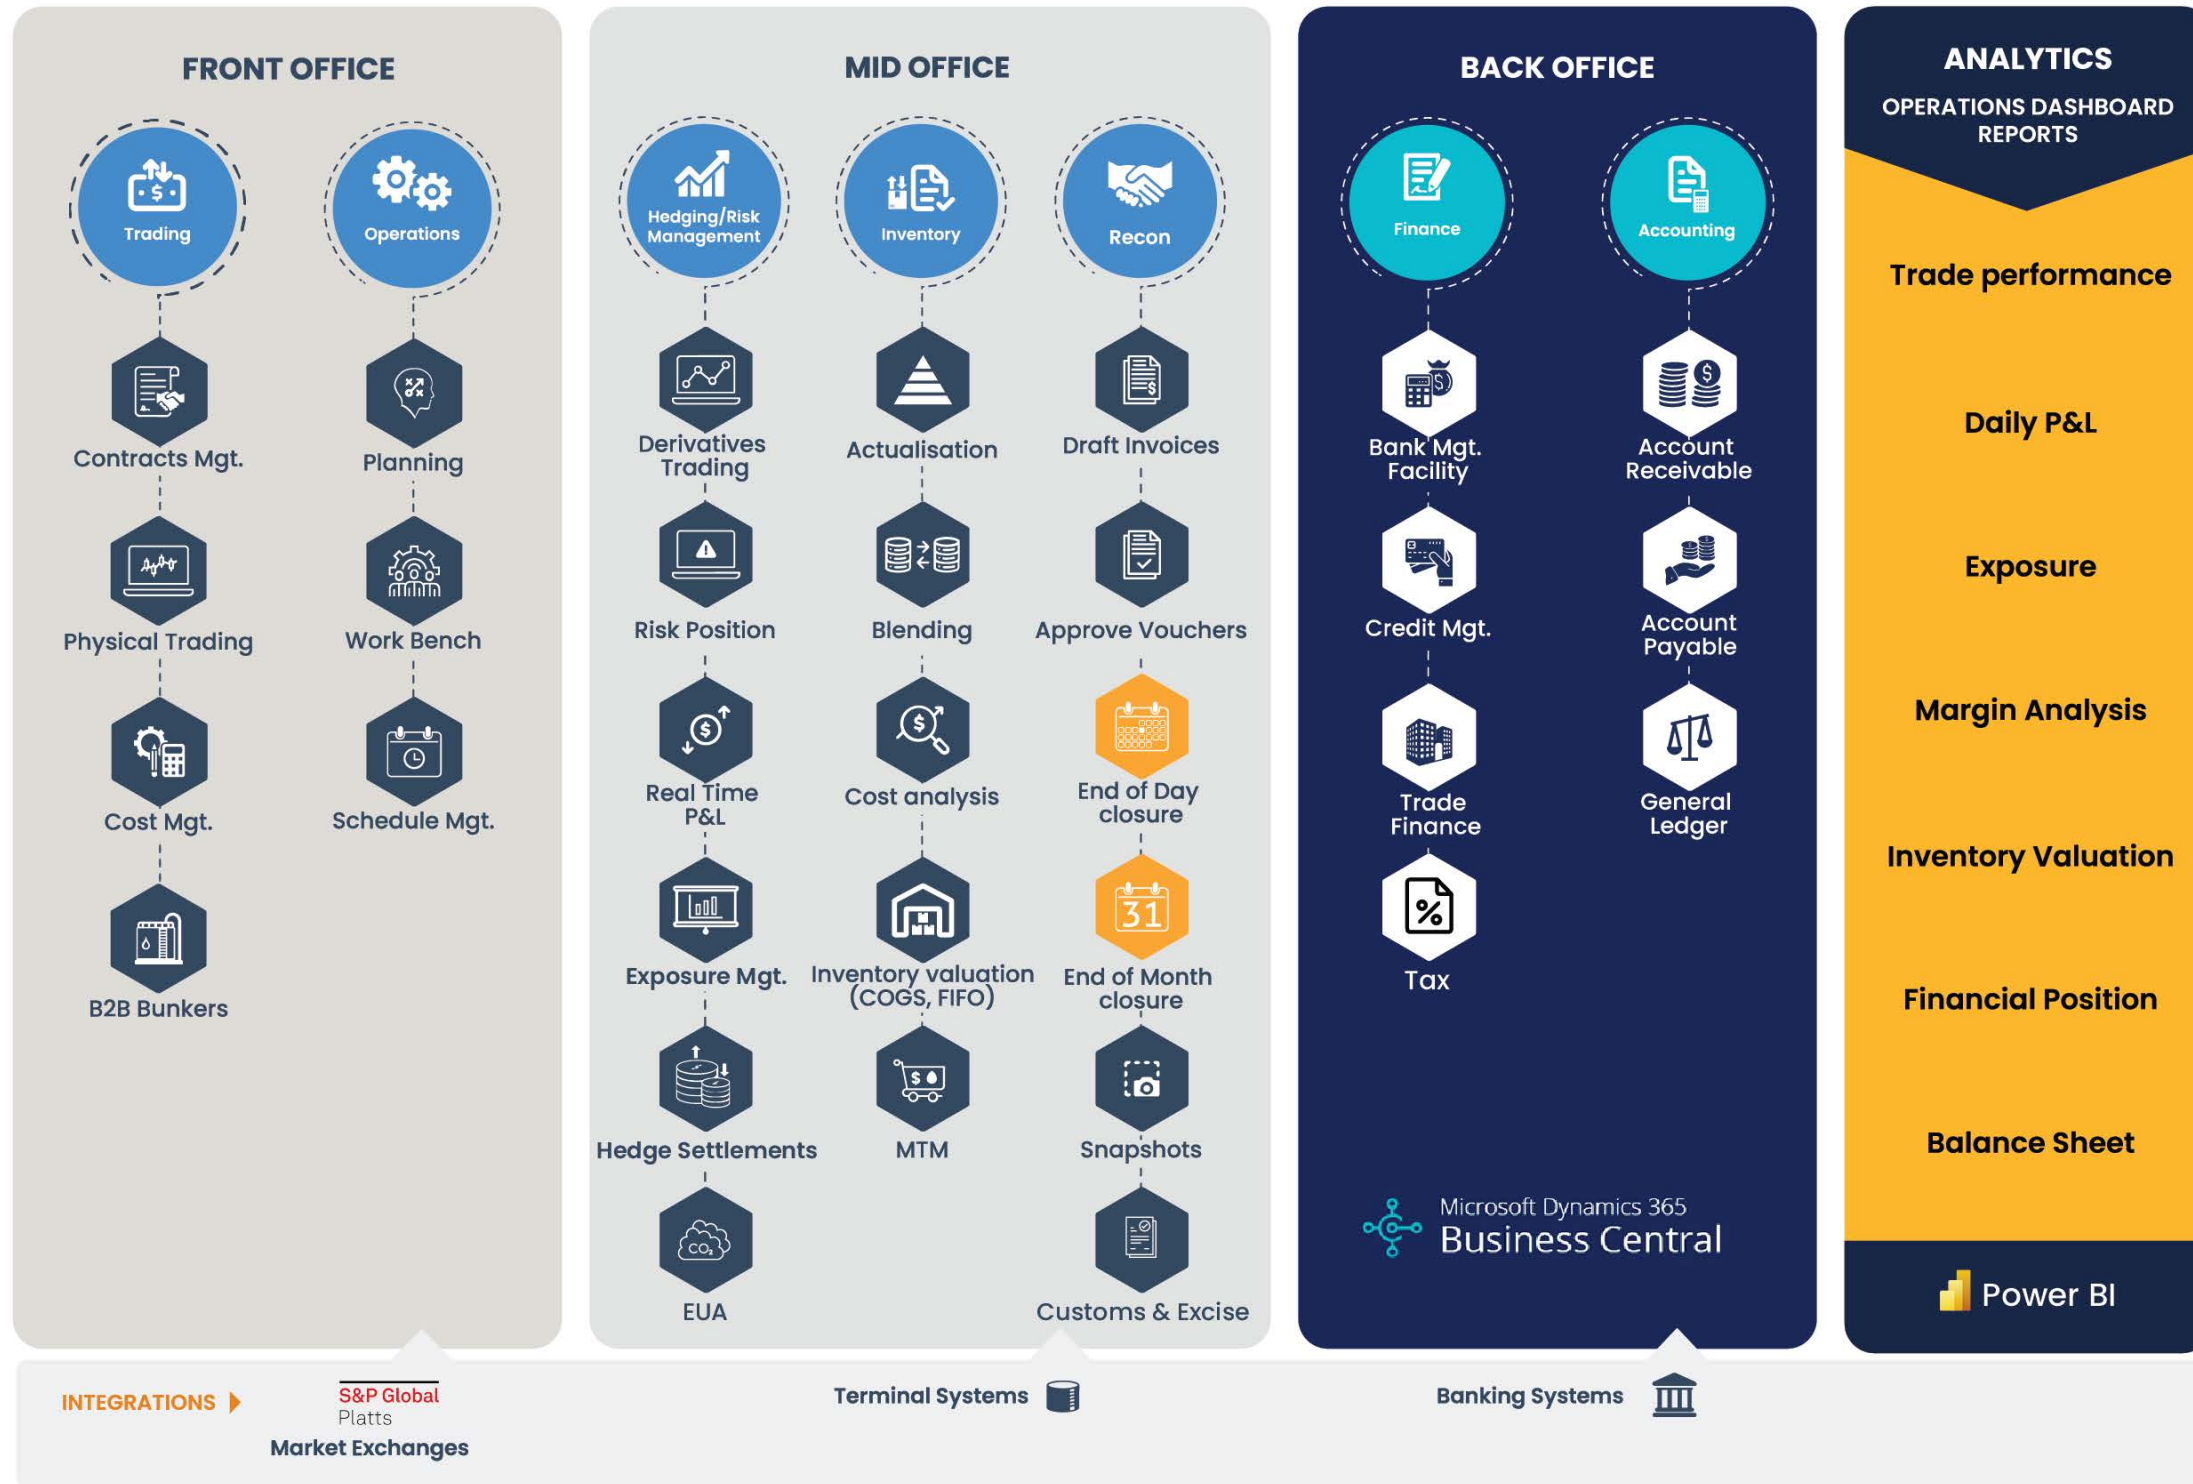

Inatech's marine fuels trading and supply management system solution, Bunkertech, a true cloud-native fuel trading and supply management supply comprising of ERP and powerful analytics has been specially designed to help you make rapid decisions based on the complete real-time overview of your bunkering operations.

The Right Solution for Businesses of All Sizes

With its modern workflow, Bunkertech automates front, mid, and back-office functions, so your team can shift focus from mundane tasks to seamless operations and strategic growth drivers.

Exceptional Functionalities

Delivery Methods:

SaaS: Multi-tenanted; Hosted in Private Cloud; Hosted in Public Cloud

Key Benefits

Bunkertech utilises the experience of working with the leading bunker traders and suppliers in the world's biggest bunker locations to help you make **PROFITABLE** and **RAPID** decisions.

Visibility and control:

Access real-time views of inventory, credit lines, trading PnL, exposure, and operations. Get relevant information including counterparty performance, historical data related to vessels, market prices, and the minimum selling price.

Cost optimization:

Get a holistic view of the tank balances and movement schedules to plan deliveries, reducing delivery and operational costs.

Inventory management:

Know fuel quantity and volume, calorific values, contracts that are priced and unpriced; the cost and the mark-to-market value of inventory, its location as well as the profit and loss of each sale. Moreover, gain visibility on inventory gains and losses.

Risk management and regulatory compliance:

Promote best practices across the organization, and minimize operational risk with Bunkertech's in-built workflows and automated checkpoints.

Supply chain optimization:

Calculate the expected quantity and quality of the inventory, based on physical movements. See the difference between what is expected and what is available once the physical tank balances are integrated into the system.

Better cash flow:

Improve payment collection and visibility across the company and optimise cash flow using reconciliation and financial accounting applications.

EUA's & ETS:

Trade EUA's (European Allowances) and address the changes in market brought about by 'Fuel EU Maritime'

Compliance:

Ensure compliance with latest regulations & sanctions (additional plug-in software)
