

TECHOIL DISPATCH

UNLOCK SEAMLESS EFFICIENCY
AND OPTIMIZE YOUR FUEL
SUPPLY CHAIN

INATECH[®]
An Aspire Software Company

Introduction

Revolutionizing Fuel Operations & Supply Chain Management for Petroleum Wholesales, Distributors, and Haulers in the USA. With TECHOIL Dispatch (TOD), experience a game-changing solution for managing fuel operations and supply chain processes. Our cutting-edge platform empowers users to:

Avoid Costly Runouts: Real-time forecasting and direct ATG access.

Optimize Costs: Buy fuel at the best price, at the right time.

Utilize Major Feeds: Access all major oil and fuel price feeds, including DTN, OPIS, and PLATTS.

Real-time Order Tracking: Reduce phone calls with online order and delivery status updates.

Enhance Delivery Speed: Improve fuel delivery speed and ensure driver accountability.

Simplify Scheduling: Quickly schedule deliveries with one-click drag-and-drop dispatch.

Paperwork Elimination: Say goodbye to paperwork with electronic BOL's and delivery tickets.

Swift Invoicing: Get paid faster by invoicing within 5 minutes of dropping fuel.

Exceptional Functionalities

Delivery Methods:

SaaS: Multi-tenanted; Hosted in Private Cloud; Hosted in Public Cloud

Key Features

Techoil Dispatch's features have been developed to enhance truck utilisation and driver accountability, avoid errors and paperwork, improve productivity and rapid decision-making, as well as ensure supply at the lowest possible laid-in cost.

1. Wholesale Petroleum Sales Tools:

- Outbound price notifications and third-party price service integration.
- Automatic notifications via user-defined schedules.
- On-demand notices for day deals and midday price management.

2. Fuel Procurement:

- Integration with third-party price services.
- Aggregate views of normalized price data.
- Fuel contract management and best buy determination.

3. Order Management:

- Quick order creation based on available capacity and demand.
- Automatic order generation based on inventory forecasts.
- Support for common carriers and company-owned logistics operations.

4. Logistics:

- Vehicle and driver management with compliance tracking.
- Real-time, asynchronous order updates.
- Card and timeline-based dispatch options.

5. Freight Invoicing:

- Scenario-specific management of freight rates and surcharges.
- One-click invoice creation using predetermined charges.

6. Fuel Invoicing:

- Motor fuel excise and sales tax management.
- Automatic application of fuel taxes, allowances, and fees.
- Minimize invoicing effort with prepopulated data.
